Introduction

With the deployment of ACE e-Manifest: Rail and Sea (M1), rail and sea carriers will have the ability to create a list of authorized Type 2 In-Bond users in their ACE Secure Data Portal Accounts. **This functionality will allow the carrier to control who can obligate their Type 2 custodial bonds (CBP Form 301).** Although carriers are not required to utilize this functionality, carriers who choose to control access to their bonds have the ability to indicate the specific ports and lengths of time a carrier or broker is authorized to obligate their bond.

NOTE: The in-bond authorization file is only applicable for in-bonds submitted via EDI to the ACE rail and sea manifest functionality. Air AMS manifest will not utilize the in-bond authorization functionality at this time. Also, during the time period when ACE rail and sea manifests and AMS rail and sea manifests will be operating simultaneously, in-bonds created via AMS legacy rail and sea manifest will not utilize the ACE in-bond authorization functionality. QP filers submitting in-bonds into the legacy AMS application during this time frame will not utilize the ACE in-bond authorization functionality.

If a rail or sea carrier elects not to utilize the In-Bond Authorization functionality, ACE will **NOT** restrict the use of their bond by other parties, i.e. any party will be allowed to use the carriers bond. If a carrier wants to limit bond usage to their own company they will need to add themselves as an “*Authorized Partner*.” This action will exclude all other parties from utilizing the carrier’s bond. If the carrier wants to authorize other partners to use their bond, they must first remove their Standard Carrier Alpha Code (SCAC) from the list of “*Authorized Partners*” before adding other SCACs and filer codes.

Rail and sea carriers with an activity Type 2 bond will be able to identify carriers by SCAC and In-Bond filers by filer codes in their ACE Portal Account, for the purpose of limiting use of their bond to these entities. The bond is always open to

May 2012

Topic: In-Bond Authorization

ACE Rail & Sea Carriers

the bond owner. Once an entity is entered into the “In-Bond Authorization File”, no other carriers, brokers, or QP filers other than the ones identified, will be able to initiate an In-Bond request via manifest declarations, In-Bond submissions or subsequent In-Bond requests. ACE will not notify your business partner that their SCAC or filer code has been entered in your In-Bond authorization file.

The Trade Account Owner will need to grant full access to the Accounts tab to any Proxy Trade Account Owner or Account User who needs to add authorized partners.

Creating a Carrier In-Bond Authorization

To create a list of authorized carriers to use your Type 2 bond, log into the ACE Secure Data Portal; select the **Accounts** tab and follow the steps below:

1. Select **Carrier** in the drop down menu next to “View” and select **Go**.

The screenshot shows the 'Task Selector' form. Under the 'Select Account Type' section, the 'View' dropdown menu is open, displaying a list of account types: Carrier, Broker, Cartman, Claimant, Driver/Crew, FTZ Operator, Facility Operator, Filer, Importer, Lighterman, Surety, Service Provider, Shipper, and Consignee. The 'Carrier' option is highlighted. A 'GO' button is visible next to the dropdown.

2. From the account list in the “Account Selector List” portlet, click the “+” beside the top account.

The screenshot shows two portlets from the ACE Secure Data Portal. The 'View Top Account' portlet displays information for 'Zoom Zoom Transportation Services', including ACE ID, Organizational Structure, DUNS #, Website, and End of Fiscal Year. The 'Account Selector List' portlet shows a table of accounts with columns for Type, Last Name, First Name, Phone, and Email. The 'Account Owner' account is listed with the name 'Dispatcher Timely' and phone number '571-468-5129'. A red arrow points from the '+' icon next to the 'Account Owner' account in the 'Account Selector List' portlet to the 'View Top Account' portlet.

Topic: In-Bond Authorization

ACE Rail & Sea Carriers

3. Select the carrier account that is associated to the bond.

A screenshot of the 'Account Selector List' window. It has a title bar with a question mark and a close button. Below the title bar is a 'View Settings' section with 'View By:' and two radio buttons: 'Acct Name' (selected) and 'SCAC'. Below this is a 'Sort by:' dropdown menu set to '--Select--' with a 'Go' button. The main section is titled 'Accounts' and contains a list of links: 'Zoom Zoom Transportation Services', 'Zoom Zoom Carrier Transportation', and 'Zip & Zoom Rail Road'. A red arrow points from the text 'Select the carrier account that is associated to the bond.' to the 'Zoom Zoom Carrier Transportation' link.

4. Select the **Bonds** tab in the “Task Selector” portlet

A screenshot of the 'Task Selector' window. It has a title bar with a question mark. Below the title bar is a 'Select Account Type' section with 'View:' set to 'Carrier' and a 'GO' button. The main section is titled 'Select Task' and contains a list of links: 'Change History', 'Reports', 'BAL', 'Action Plan', 'Bonds', 'LPCs', 'Transactions', 'Declarations', and 'Mode of Communication'. A red arrow points from the text 'Select the Bonds tab in the “Task Selector” portlet' to the 'Bonds' link.

Topic: In-Bond Authorization

ACE Rail & Sea Carriers

5. Select the blue hyperlink under the **ACS Bond #**. The bond status must be active for the user to add an authorized partner. Authorized partners can only be added to Type 2 Custodial Bonds.

Showing 1 - 2 of 2

ACS Bond #	SCAC #	Carrier Name	Bond Status	Termination Date	Activity Code
991000301	ZZCT	ZOOM ZOOM CARRIER TRANSPORTATION	Active		3

11. Once you have saved the relationship to your account, you will be returned to the “Bonds” portlet where you can view the partner you just added. All partners are added without date or port restrictions. The following section, “*Maintaining Carrier In-Bond Authorization*” will explain how to set port and date restrictions.

Maintaining Carrier In-Bond Authorization

This section includes information on how to maintain your “*In-Bond Authorization*” file, limit port and date access and remove partners from your account.

Limiting In-Bond Authorization Use to Newly Created Partners

In-Bond Authorization functionality allows the carrier to restrict partners’ use of their bond to specific ports and date ranges. There are four fields that the authorizing carrier is required to populate:

- Origin Port – The port from which the goods are being requested to depart
- Destination Port – The port to which the goods are being requested to be transported
- Effective Begin Date – The start date of the authorized bond usage
- Effective End Date – The end date of the authorized bond usage.
Note: If no end date is entered there will be no date restrictions on the use of the bond.

The following steps provide instructions on granting limited bond authorization:

1. From the “*In-Bond Authorization*” tab, select the **Name** of the *authorized partner* whose access you wish to restrict and select **OK**.
