

UNIQUE

YOUR CARGO. OUR SOLUTIONS.

CROWLEY®

People Who Know®

Expertise and Resources

With years of experience in shipping the large and unusual, you can be confident that Crowley can handle your oversized equipment throughout the shipping process. Not only are we logistics experts, we also operate our own Ro/Ro and Lo/Lo vessels. This means your cargo is in our care from when you drop it off to when you receive it again. We don't use third party carriers, instead we provide you with a single point of contact for both inland and ocean moves.

With Crowley offices in locations throughout the United States, Central America and the Caribbean, our experts are standing by to attend to the unique needs of your out-of-gauge cargo.

Also strategically positioned throughout our lanes of service is a fleet of the industry's most specialized shipping equipment. Too big or too heavy to be carried on a piece of equipment? No problem, our Ro/Ro vessels allow cargo to roll-on and roll-off utilizing its own wheels.

We're experts in the markets we serve, we're experts in the cargo we carry, we're experts in shipping and logistics. We understand the importance of your shipment and we pledge our commitment to provide world-class service to you time and time again.

● Port Terminals — Liner / Container Routes

Your One-stop Shipping Solution Between the U.S., Central America and Caribbean

Crowley is the leading ocean cargo carrier between the United States and Puerto Rico, the Virgin Islands and Eastern Caribbean, Bahamas, Central America, Dominican Republic, Haiti and Cuba.

Customers are served through several U.S. ports that stretch from the Northeast to the U.S. Gulf Coast. Each U.S. terminal is modern, efficient and strategically located near major highways and railheads to ensure cargo is moved quickly to its final destination.

Quality is reflected in Crowley's ISO 9002 certification and the quality-service awards it regularly receives from customers. The company is also an industry leader in security. Not only was Crowley first to join the Customs-Trade Partnership Against Terrorism Program (C-TPAT), but it was also among the first to become fully validated, which means customer cargo is more likely to receive priority entry and clearance.

Large and Diverse Equipment Fleet

At Crowley, we understand the importance of offering our customers a wide choice of modern, reliable equipment. Today our fleet consists of more than 45,000 quality units. Providing the fleet capabilities to meet your cargo-handling requirements is an important facet of Crowley's equipment management program. Our equipment is readily accessible, and once dispatched, a state-of-the-art computer system is able to pinpoint its position anywhere in the transportation chain. Regularly scheduled maintenance and inspections ensure that our equipment is in top condition at all times. We believe that providing clean, well-maintained equipment is a part of the first-class service you've come to expect from Crowley.

Worldwide and Domestic Transportation Solutions

Crowley provides third-party logistics services backed by deep relationships, far-reaching resources, and an impeccable reputation in every country in which we operate. We have served many of the world's most dynamic corporations – including clothing giants, automakers and consumer products companies – all of who rely on Crowley for powerful solutions to their supply chain challenges.

Our team will work with you to analyze your transportation network and design a program to optimize your lane patterns, customer requirements and multi-modal shipping needs. We will also explore opportunities to save costs while improving communication and on-time delivery to your customers. Our capabilities are all but endless and include: all modes of domestic trucking and intermodal services, full and less-than-truckload, transload/warehousing, consolidation/deconsolidation, sorting/pick and pack, customs brokerage, ocean transport, air freight, and freight forwarding.
