

Fully Loaded

Designed with maximum capacity and thoughtful features to enhance maintainability and crew comfort

Jensen is committed to designing vessels that are beautiful, efficient to build and extraordinary to operate. As an industry leader for more than 50 years, we've designed and modified virtually every type, including all kinds of workboats. When you need a new vessel, you can count on Jensen to be there for you every step of the way – managing the project from concept through construction. That's Jensen full service.

Jensen Full Service:

- **Naval Architecture & Marine Engineering**
- **Hydrodynamics, Hydrostatics & Stability**
- **Ship Structures & Finite Element Analysis**
- **Marine/Mechanical Engineering**
- **Electrical & Production Engineering**
