

CB-20040

## Revetment Crane Barge

This vessel is an excavator/crane barge for the Memphis District of the Army Corps of Engineers. The barge provides a safe and effective means of rock placement during river bank revetment operations on the Mississippi River System.

Crowley's engineering services team delivers a full range of marine and engineering solutions. This includes detail and conceptual design, shipyard management, and on-site consulting services for all types of marine projects anywhere in the world. Our vessel design and marine engineering services are both extraordinary and cost effective. No matter the size and scope of your marine project, our professionals will help you achieve your objectives in the safest and most efficient manner possible.

# Vessel Specifications
