

FLL-05924

59' Fishing Vessel

Jensen's fleet of longliner designs covers a wide range of sizes and capabilities, all the way from 60 to 184 feet in length, and 4,200 to 38,000 cubic feet of hold capacity. Each design is optimized to suit the particular needs of the operators, including crew comfort and safety, fishing and processing productivity, hold capacity, noise reduction, maneuverability, operations in ice, and classification. Propulsion options on these vessels range from single-screw diesel to twin Z-drive diesel-electric, and everything in between. These vessels are configured with easy-to-build single-chine hulls, which offer a balanced compromise between construction cost and hydrodynamic hull efficiency. They can also be configured with molded (non-chine) hulls with developable surfaces when hull efficiency is a primary consideration.

Crowley's engineering services team delivers a full range of marine and engineering solutions. This includes detail and conceptual design, shipyard management, and on-site consulting services for all types of marine projects anywhere in the world. Our vessel design and marine engineering services are both extraordinary and cost effective. No matter the size and scope of your marine project, our professionals will help you achieve your objectives in the safest and most efficient manner possible.

Vessel Specifications

Overall Dimensions

Length, overall	59'-5" (18.1 m)	Main engine	500 HP, Lugger L-6140A Alaska Diesel Electric
Breadth, molded	24'-0" (7.32 m)	Fish hold volume	3069 cu feet (86.9 cu m)
Depth, molded to main deck	12'-3" (3.73 m)	Fuel oil	9588 gal
Depth, molded to shelter deck	21'-0" (6.40 m)	Lube oil	159 gal
Register tonnage	192 gross tons	Hydraulic oil	333 gal
Crew complement	9 maximum, 5 normal	Fresh water	1893 gal
