

FLL-05929

59' Fishing Vessel

Jensen's fleet of longliner designs covers a wide range of sizes and capabilities, all the way from 60 to 184 feet in length, and 4,200 to 38,000 cubic feet of hold capacity. Each design is optimized to suit the particular needs of the operators, including crew comfort and safety, fishing and processing productivity, hold capacity, noise reduction, maneuverability, operations in ice, and classification. Propulsion options on these vessels range from single-screw diesel to twin Z-drive diesel-electric, and everything in between. These vessels are configured with easy-to-build single-chine hulls, which offer a balanced compromise between construction cost and hydrodynamic hull efficiency. They can also be configured with molded (non-chine) hulls with developable surfaces when hull efficiency is a primary consideration.

Crowley's engineering services team delivers a full range of marine and engineering solutions. This includes detail and conceptual design, shipyard management, and on-site consulting services for all types of marine projects anywhere in the world. Our vessel design and marine engineering services are both extraordinary and cost effective. No matter the size and scope of your marine project, our professionals will help you achieve your objectives in the safest and most efficient manner possible.

Vessel Specifications

Overall Dimensions

Length	59'-5" (18.1m)	Hold Capacity	4,240 ft ³ (120.0 m ³)
Breadth	28'-6" (8.7 m)	Fuel Capacity	13,439 gal (50.9 m ³)
Depth	14'-0" (4.3 m)	Fresh Water	2,319 gal (8.8 m ³)
Propulsion	Single Screw, Fixed Pitch	Berths	10
Propulsion Power	615 HP (459 KW)	Gross Tonnage	174 ITC
