

FTF-14036

140' Fishing Trawler

Jensen trawlers are designed to take the worst the Bering Sea can throw at them, while providing a stable working platform for their crews. Each design is optimized to suit the particular needs of the operators, including cargo storage & refrigeration, fishing and processing productivity, offload speed, crew comfort & safety, noise reduction, operations in ice, tonnage and classification.

These vessels are configured with easy-to-build single-chine hulls, which offer a balanced compromise between construction cost and hydrodynamic hull efficiency. They can also be configured with molded (non-chine) hulls with developable surfaces when hull efficiency is a primary consideration.

Crowley's engineering services team delivers a full range of marine and engineering solutions. This includes detail and conceptual design, shipyard management, and on-site consulting services for all types of marine projects anywhere in the world. Our vessel design and marine engineering services are both extraordinary and cost effective. No matter the size and scope of your marine project, our professionals will help you achieve your objectives in the safest and most efficient manner possible.

Vessel Specifications

Overall Dimensions

Length Overall	139'-10.5"	Fuel Capacity (approx @ 98%)	69,418 gal
Length on Waterline	125'-0"	Fresh Water Capacity (approx @ 100%)	7,810 gal
Molded Breadth at Deck	36'-0"	Cargo Hold Volume (approx)	17,439 ft ³
Molded Depth to Deck	15'-8.5"	Shaft Horsepower	1800 hp
Draft to DWL (from baseline)	19'-9.5"	Accommodations	38
