

FTF-20144

201' Fishing Trawler

Jensen trawlers are designed to take the worst the Bering Sea can throw at them, while providing a stable working platform for their crews. Each design is optimized to suit the particular needs of the operators, including cargo storage & refrigeration, fishing and processing productivity, offload speed, crew comfort & safety, noise reduction, operations in ice, tonnage and classification.

These vessels are configured with easy-to-build single-chine hulls, which offer a balanced compromise between construction cost and hydrodynamic hull efficiency. They can also be configured with molded (non-chine) hulls with developable surfaces when hull efficiency is a primary consideration.

Crowley's engineering services team delivers a full range of marine and engineering solutions. This includes detail and conceptual design, shipyard management, and on-site consulting services for all types of marine projects anywhere in the world. Our vessel design and marine engineering services are both extraordinary and cost effective. No matter the size and scope of your marine project, our professionals will help you achieve your objectives in the safest and most efficient manner possible.

Vessel Specifications

Overall Dimensions

Length Overall	201'-4"	Gross Tonnage Approx.	1200 GT
Breadth	44'-0"	Frozen Cargo Hold	28,000 cu. ft.
Depth	18'-0" & 26"-10"	Fuel Capacity	136,700 gal
Propulsion Power	3300 HP	Fresh Water Capacity	8,000 gal
