

Crowley Liner Org 025816 Tariff 001	Date Filed: 07-30-2021	Date Effective: 07-30-2021	Rule #: 26	Revision: 1 Publishing Code: C
Rule Name:	Specialized Equipment			

Equipment Availability:

40' Non-Running Reefers are subject to equipment availability.

Specialized Equipment:

An in-gauge tolerance of up to a maximum of five (5) percent will be granted on all rollable, towable, flat rack cargo to provide the shipper a margin of safety, where there is a reasonable possibility of an inaccuracy in computing the measurement of cargo on behalf of the Carrier or the Shipper. If cargo exceeds tolerance allowed, shipment price will be reevaluated.

The tolerance will be granted on the overall measurements of the shipment, not the individual pieces.

To qualify for the tolerance, a manufacturer's specification sheet must be presented clearly indicating the measurements and count of the item or items in the shipment.

This Rule will not apply for the following:

- Passenger Vehicles, Buses, or any cargo subject to linear foot/meter rates
- Shipper owned or Leased Equipment
- Per container rates filed from inland points

Maximum weight per container/trailer shall not exceed the net cargo weight permitted per the intermodal equipment register. Cargo loaded more than the allowed weight shall be subject to excess weight charges.
