# OCEAN CLASS

The ocean-class vessels are twin screw with controllable pitch propellers (CPP), in nozzles with independent high lift rudders. Their hulls are welded steel construction and each is outfitted for long range ocean towing, dynamic positioning and general purpose vessel requirements.

The vessels are transverse framed with transverse and longitudinal bulkheads and are designed with all oil tanks inboard of the side shell to create a double hull. Propulsion is provided by two (2) Caterpillar C-280-12 Tier II\* diesel engines, designed to operate on Ultra Low Sulfur Diesel fuel and each is rated at 5440 BHP @ 1000 RPM driving the CPP Propellers through Reintjes LAF 5666 reduction gears.

Electric power is provided by one (1) 340 kW Caterpillar C-18 Tier II\* auxiliary generator (Harbor Generator), two (2) 1475 KVA, for the DP1 and 1.5 for the DP2 version, shaft generators and one (1) 125 kW Caterpillar C-6.6 Tier II emergency generator system.

The vessels are flagged in the Registry of the United States of America and comply with all applicable rules and regulations for unrestricted ocean towing.

*\*capable of upgrade to Tier III or IV*
