

THS-06526

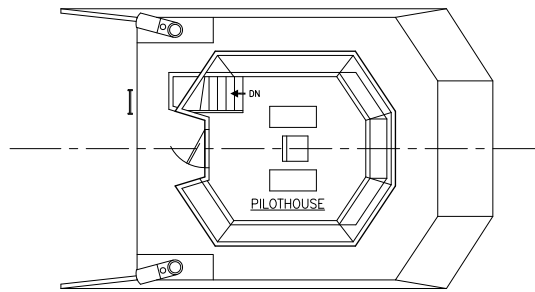

65' x 26' Ship Assist Tug

The design and layout of this 65' vessel follows the general style of a small ASD tug, load line only. Equipped with Cummins main engines driving Ulstein Z-drives, the vessel can operate as an assist tug for docking and handling barges and ships. The tug is fitted with the same fendering as one would find on any other harbor tug and there is a small fire monitor installed. One stateroom is on the main deck with two more below, accommodating a crew of up to 5.

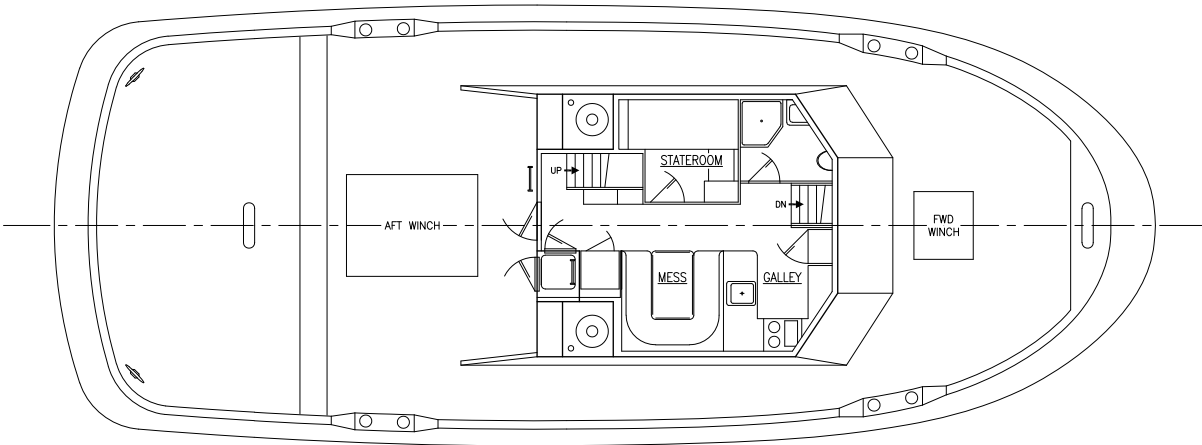

Overall Dimensions
