

TWB-04522

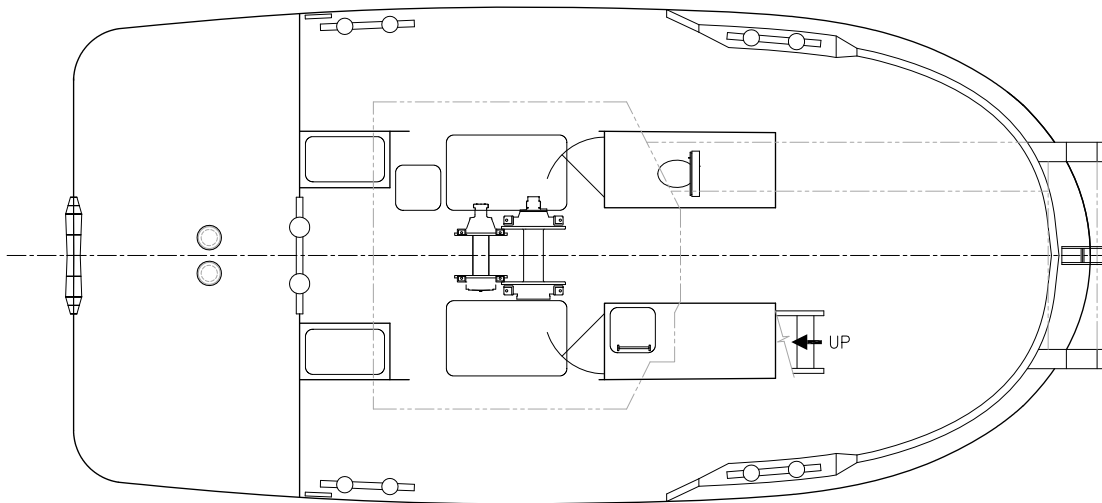

45' x 22' Workboat

This small workboat was designed to work in tight quarters and shallow drafts, originally to support dredging operations as a rig tender for the barge. The unique design provides value for a multitude of workboat operational tasks, such as anchor handler, tow assist vessel, small tow astern or on the hip, push vessel or for marine construction or dredge support. The design incorporates EPA Tier 3 engines, eliminating the need for SCR system and simplifying the engine room and exhaust system to maintain low maintenance costs over the lifetime of the vessel.

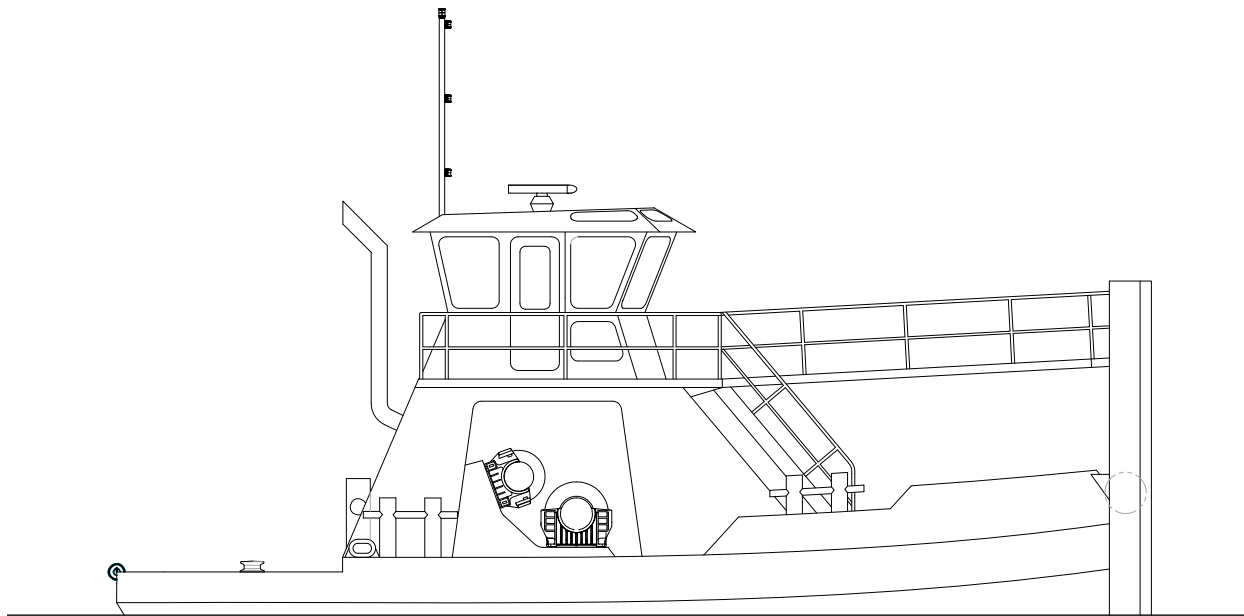

Overall Dimensions

Overall Length.....45'
 Molded Breadth22'
 Molded Depth9'4"
 Molded Draft..... 7'-5"
 Propulsion Twin Screw
 Main Engines Diesel, Tier 3

Horsepower 1,000 HP total
 Fuel Capacity.....6,026 gal
 Gross Tonnage <50 GRT
 Crew..... 3
 ClassN/A
