

LPB-32684

326' x 84' Petroleum Barge

The 326' x 84' Petroleum Barge is a double-hull oil barge that has fourteen tanks for carriage of multiple clean oil products. Two diesel generators provide electrical power to the barge. Housed in a centerline pump house are four diesel engines which drive four cargo pumps that can discharge up to four different products at a time through pipe manifolds to port or to starboard. The Tankerman's control house is located to port of the pump house. The barge carries a spill response container forward and two deck storage containers aft along with three 20' ISO tanks forward.

Overall Dimensions

Length 326'-0"
