The verification of the gross mass can be achieved by either of two methods:

1. Weighing the packed container.
2. Weighing all packages and cargo items, including the mass of pallets, dunnage and other securing material to be packed in the container and adding the tare mass of the container to the sum of the single masses, using a certified method approved by the competent authority of the State in which packing of the container was completed.

Please contact your local Crowley office if you have any questions.
